Dear Parents and Carers

'Parent Hub' – a communication app for parents

We are always looking at ways to develop our communications with parents further and so we recently registered with 'Parent Hub' which is a communications app for parents. The app hosts a messaging service for school which allows attachments and pictures to be linked with messages. The benefits of the app are that we are not limited to the amount of characters we can add to a message, and we can send attachments and images via the app. It is completely free both for parents and for us as a school; therefore that we can save a significant sum of money whilst providing a more enhanced messaging service.

Those of you who are already registered with Parent Hub may have noticed some messages being sent through the app with various attachments. Our aim is that we would like all parents to download the app as soon as possible as more messages will be sent this way. We will in the short term continue to use the text messaging service but from January onwards we will start to phase this out.

The best way to join is by downloading the Parent Hub app (the one with the white background.) It is really simple to set up on any kind of phone: see information overleaf for more details. Please note it is important to allow notifications for this app so that you are notified immediately when a message is sent. If you want to know more or you need help downloading the app please pop into the school office any time.

Yours sincerely

Mr A Rhodes

Deputy Head Teacher
